JRI Financial Suite ("JFS")

Would you like to reduce your operating expenses and further position yourself for increased revenues while introducing a robust, flexible, and integrated accounting and finance system across your entire company? Let us show you how...

WHAT IS JFS? JFS is a financial and accounting business application suite that runs entirely over the Internet. It allows you to manage your general ledger, accounts payable, Multi-GAAP conversion, custom reporting, profit and loss statements, daily transaction summaries, balances, receivables and payables. And your data is always current.

INTEGRATED FINANCIALS. Using the Oracle e-Business Suite as a platform, JFS' single and complete data model ensures that you have only one customer definition shared by all your financial applications. You get better information out of your system and also benefit from consistent, timely, accurate, and enterprise-wide data.

FLEXIBLE AND EFFICIENT. JFS can help you automate manual operations, make smarter decisions with better and timely information, share unified information across the enterprise, reduce IT expenses, and run your business more efficiently.

WE USE JFS AND OUR SERVICE METHODOLOGY TO ADDRESS YOUR FINANCIAL MANAGEMENT CHALLENGES AND TO IMPROVE YOUR FINANCIAL PROCESS ...

- Are your enterprise systems fragmented?
- Do you wish to further automate data entry & manual processes?
- Is your data unified in one place?
- Is accounting transparency and compliance a challenge?
- Do you wish to have more flexibility and functionality?
- How can you close your books more efficiently?
- Is it difficult to manage your data across departments/locations?
- Are you spending too much on IT maintenance costs?
- Do you need to accelerate your financial workflow?
- How do you get better business intelligence and reporting?

"JFS On Demand transforms business application delivery from the traditional model – system investments and longer time-to-market for product software licensing, design, implementation, and costly maintenance – to a utility-based model on a variable price basis" says Jim Maguire, Business Delivery Manager of JRI America.

KEY JFS FEATURES INCLUDE:

GENERAL LEDGER

A comprehensive financial management solution that dramatically enhances financial controls, data collection, information access, and financial reporting throughout your enterprise.

ACCOUNTS PAYABLE

An expenditure management tool, streamlines your procure-to-pay process while providing strong financial controls and strategic financial information.

ACCOUNTS RECEIVABLE

An invoicing and collections management application, streamlines your order-to-cash process while providing strong financial controls and strategic information.

CASH MANAGEMENT

Enterprise-wide solution for managing liquidity and controlling cash. Cash Management gives you direct access to expected cash flows from your operational systems. You can quickly analyze enterprise-wide cash management requirements and currency exposures, ensuring liquidity and optimal use of cash resources.

ASSET MANAGEMENT

A comprehensive asset management solution ensures maintenance of accurate property and equipment inventory as well as optimal accounting and tax strategies.

ON DEMAND SERVICES AND SUPPORT:

STATE-OF-THE-ART: On Demand access to JFS business applications via the Internet. Our Infrastructure comprises the hardware, network, and storage computing layers such as Intel, Linux, SAN and NAS to provision sophisticated solutions and enables reliable performance for your application users.

CUSTOMER SERVICE: Online and Hotline support for all your customer service needs including automated service management to monitor and manage availability, performance, security, service requests, problems, and change management.

FLEXIBILITY: Flexible service terms including:

- Choice of Location: Hardware facilities can be located at one of JRI America's data centers or at the customer's certified data center.
- Flexible contracts: JRI America offers one-year and multi-year contracts with flexible service level agreements.

PREDICTABLE COSTS: JRI America provides utility-based pricing on a per user per month basis over the term of the service contract.

EASE OF TRANSITION: We have the tools and experience to ensure a smooth migration and expedient time-to-market for your JFS implementation.
